Work Experience:

Jan 2022 –Till date, Portfolio Manager

Mythri Consulting LLC -Client: PwC LLP Florida - USA (Contract, Remote) Portfolio and Program Management for Wealth Management Integration with PwC Financial services clients for Southeast region USA.

- I was accountable for delivery of PwC Financial services platform for AllGen financial advisor's clients Wealth management portfolio. Migration of existing tools/applications to Azure, integrating with PwC Insights Engine, customized Assest management features and reports.
- I formed, coached and mentored the Scrum team on scrum ceremonies like daily standup, Sprint/PI planning, Sprint Demos, Sprint Retrogression.
- I set up JIRA for Product backlog prioritization, ensured that Product owner is successful in his role by setting up right communication model between platform and client teams.
- I setup MOS (Management Operation Systems) for status updates. JIRA and MS tools are used for sharing reports at various levels. Client, Management and Team Reports are automated and shared as per MOS.
- I worked with Architects, from PwC and AllGen , Product owner and development teams for achieving technical and program goals.
- I owned program risks and issues by early identification, setting up risk mitigation strategies, resolving issues and removing impediments in a timely manner.
- Cost and schedule status updates to PwC and Client management teams as per MOS. Estimating and Presenting the SOW and estimates for upcoming releases as per roadmap defined.
- Setup KPI measurement/metric/status reports to executive management and PMO's.
- Onboarding new vendors by following Vendor management process.
- Azure cloud - AD, SQL, API mgmt., Devops, Power BI, .NET; Atlassian JIRA, Confluence, MS tools.

May 2002 – Jun 2018

Honeywell-Bangalore – India –Permanent, Full Time, Onsite

1. Program Manager - 2013- 2018:

Smart Buildings-Building Optimization Services: Honeywell Home and Building offerings. Suite of products HVAC, Security, Occupancy delivered via mobile and Cloud.

- Played key role in mapping of Honeywell development process with SAFe. Formation of Agile Release Train (ART) with Scrum teams from 4 development (India, US, China, Australia) locations across globe. Defined Structure of Scrum teams with needed R&R and Scrum/ART ceremonies.

- Partnered with Product offering and Engineering during NPI concept and evaluation phases. Deployed multiple scenario-based pilot sites to evaluate the concepts and drive roadmap with PFAT commitments.
- Successfully handled multiple challenges with MVO, NPE, PFAT, HBS devops process, Pilot deployments, field support/training, Operations readiness, NPI phase 6 success for next version funding.
- Successfully managed the Mobility App's portfolio with CET ownership to drive the NPI governance, MOS, AOP of \$ 7.6 M and SIOP planning across multi location and functional groups.
- There were more than 10 cross- functional teams involved in the program, stake holder management is very critical. Successfully managed all levels of stakeholders by defining the right change management processes, communication plan, R&R, and transparent program updates.
- JIRA and Microsoft enterprise Project is extensively used with customizations.

2. Project Manager :2010-2013

Smart Energy -DRAS (Honeywell Smart Grid Energy Demand Response Automated System): A SaaS offering for peak load management for Utility companies,

- I worked with product marketing to prioritize business needs using QFD, deriving project charter and project milestones.
- I arrived at change management, communication and stakeholder management plans for managing project triple constraints.
- I deployed best practices teams should follow for requirements, design, code and tests like traceability metrics, FMEA, RCA, Risk identification/planning, functional and non-functional test strategies, maintaining knowledge base and many more.
- Honeywell strategic customer had rollout issues. I was at site for 2 months to bring back situation to Normal and customer regaining confidence on Honeywell Programs.
- After the first successful launch there were more than 10 incremental releases contributing 6+ million revenues to Honeywell in the first 3 years of Honeywell venturing to utility business.

3. IT Project Manager - 2008-2010

BBCS – Back Bone Customer Service: Migration project to migrate age old Honeywell Home and Building support tools/systems to cloud and RDBMS.

4. Project Lead/Team Lead/Developer -2002-2008

VERA (Versatile Energy Resource Allocation): An enterprise application to effectively track/optimize energy utilization across Building HVAC units.

Instant Alert: Honeywell School Alerting system.

AIMS: Workflow Management systems.

Other: Master's in computer applications. Vellore Institute of technology; Tamil Nadu, India. I have Green Card work authorization (GC EAD).
